The GSN had a permanent telephone line leading from DRESDEN to SCHLUCKENAU, Czechoslovakia, via KLOTASCH (N 52/F 29) - RADEBERG (N 52/F 39) - WOLLSBORG (N 52/F 39) - STOLPEN (N 52-F 49) - WOLLSBORG (N 52/F 39) - BLUSTADT (N 52/F 59) - SCHNITZ (N 51/F 58), constructed in mid-August 1949. It was a four-wire overhead line. Branch lines were observed in STOLPEN and WOLLSBORG.

Comment:

The construction of this telephone line by the Soviets is noteworthy as there are already several trunk lines leading from DRESDEN to Czechoslovakia (DRESDEN-AUSSIG, DRESDEN-BUTTEN-LOEBU-ZITTU-REICHENBERG). It is possible that this new line is to provide a direct connection of high command agencies or a special connection for the Soviet Air Force. Such a purpose is indicated by the geographical location of the line which does not run along main traffic routes as would administrative lines.
